

■ ■ ■ Selection tips from former S.3 students ■ ■ ■

Lam Hiu Lam 4E

I have chosen Biology and Chemistry because I am interested in matters about Biology. I will explore Biology knowledge myself. After studying in Secondary school, I found that the 2 subjects are related. Also, they can help me achieve my dream to help and cure patients.

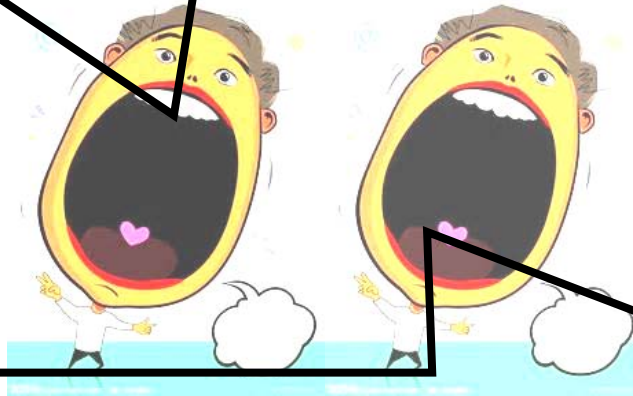

I understand that my dream is still very far away from me, but I believe that my effort will not be wasted. If I work hard step-by-step towards my goal, I can reach my target. In short, Biology and Chemistry are the keys to my dream.

Lam Kwan Tung 4E

In my Form 3 studies, I found that Science is an interesting subject because it is not a boring subject and it helps improve my thinking. Gradually, I have developed my interests in Science especially in Biology. So, I have chosen Biology and Chemistry. I learned that our body structure and the way we learn are strongly related to our daily lives. Starting from that moment, I realised that studying is not simply an academic matter. More importantly, I can learn more knowledge. I found it very meaningful. Although there is lots of information to memorise, I believe I can overcome the difficulties.

Lam Chun Yip 4E

I once found the book 'Currency Wars' in the bookshop and I bought it, to take home to read. I was very interested in it and couldn't stop reading. Because of this, I have chosen Economics and Accounting as my elective subjects. During the last 2 terms, I have gained a lot of new knowledge and had a lot of fun. I hope I can learn more new things and get good results in the DSE. I will work harder in my study.

To Chun Ting 4A

My elective subjects are Economics and Accounting. When I was younger, I did not know how great these 2 subjects were. As time goes by, my interests for the 2 subjects has grown. In Form 4, I have the chance to study the 2 subjects. In Economics, I started to know how to gain more with limited resources. In Accounting, I have learned how to prepare financial budgets and book-keeping etc. The 2 subjects have trained my logical thinking skills and laid the foundation for my future living. At the moment, I have only learned the bits and pieces of the 2 subjects. However, I believe that I can master a lot in the future.
